

Ventura VR400
**The XL campervan
with more space**

VENTURA
CAMPERVANS

Everything evolves and gets bigger

So why can't the campervan?

Say hello to the VR400... the XL campervan

The Ventura VR400 takes the traditional campervan to a new level.

The first of the XL campervans the Ventura VR400 gives you more space than the traditional van while maintaining the much-loved side-kitchen campervan layout.

The VR400 offers the one thing the VW Transporter can't... and that's room. More room in the living area, seating for up to 6, and a boot space that you can increase and decrease as you want. After all, no one with a camper ever said I've too much room!

Choose from 3 models - VR400, Plus & Touring

What is an XL campervan?

Quite simply, it gives you more room than the traditional VW campervan while maintaining the much-loved side-kitchen layout.

Six areas where the VR400 gives you more

1

Seating for up to 6

2

Over 6 ft of headroom

3

Flexible living space

4

Sleeps 4 in comfort

5

Spacious living area

6

Expandable boot space

1. Seating for up to 6

Choose the 3 seat front bench option and you'll have seating for 6. With the standard 5 seat set up, the two front seats swivel around to face the living area.

2. Over 6ft of headroom

Unlike a VW the VR400 has enough headroom for most people. No need to raise a pop top to gain headroom.

3. Flexible living space

The rear seats on rails lets you expand or shrink your living area to suit you. Slide the seats all the way back to the rear doors and you'll have plenty of room. Likewise if you need space in the boot simply slide the seats forward.

4. Sleeps 4 in comfort

A bigger living area means when you fold down the Fabworx double bed you'll have more useable space in front of it compared to a Transporter. The pop top is also much bigger with a larger bed for a more comfortable nights sleep.

5. Spacious living area

Compared to VW Transporters the VR400 aces the VW on living space. More space means more comfort. And the living area is substantially bigger than a Transporter.

6. Expandable boot space

With the seats on sliding rails you can make the boot as big or small as you like. Perfect for bikes, kayaks or whatever you like!

Even the standard equipment list is bigger

Every VR400 comes with the following fitted as standard

- 6ft x 4'3" Fabworx double bed on rails
- Wallas diesel hob and heater
- Touch screen master control panel
- Stainless steel sink
